

CAPABILITIES STATEMENT

OVERVIEW

Federal agencies are tasked with transitioning to the cloud, consolidating data centers, and advancing their technical capabilities – all while maintaining strict data security. The partnership forged by industry experts NALAComm and Data Canopy will ensure your agency has virtualization strategy, resources, and infrastructure required to accomplish your mission objectives. Gain additional flexibility in procurement by leveraging the SBA 8(a) designation of NALAComm for sole sourced projects up to \$4.7M.

ABOUT THE PARTNERSHIP

As partners, our mission is to reduce the cost and complexity of deploying hybrid and multi-cloud environments by leveraging expert consulting to ensure physical and virtual infrastructure is highly connected, secure, and accessible.

Our scope of services include:

- Digital Transformation strategy
- Private cloud (VPS)
- Low-cost public and multi-cloud connectivity; providing access to Azure, AWS, and Alibaba
- High-performance compute and storage environments
- Disaster Recovery as a Service (DRaaS)
- Colocation from Tier III data center facilities nationwide

SERVICE OFFERINGS

Support initiatives, drive innovation. Keep your mission critical data always available and ensure connectivity and uptime from highly secure, incredibly reliable data centers. By leveraging this partnership to support your hybrid and multi-cloud initiatives, your agency will benefit from:

CLOUD

Get strategic guidance from virtualization experts and leverage private and hybrid cloud environments available to be customized to your agency's needs.

COLOCATION

Colocation hosting is provided exclusively in Tier III enhanced data centers, which are HIPAA, PCI-DSS, and FISMA High compliant.

DATA STORAGE AND MANAGEMENT

Address all performance, capacity and reliability requirements by leveraging enterprise storage solutions.

DISASTER RECOVERY

Prevent downtime and data loss with cost-effective, geo-redundant storage and disaster recovery solutions.

CAPABILITIES STATEMENT

SECURITY SERVICE CAPABILITIES

FedRAMP is a government-wide program that provides a standardized approach for assessing, authorizing, and continuously monitoring cloud solutions and service

The Payment Card Industry Data Security Standard was created by the major credit card issuers, and applies to companies that accept, store process and transmit credit cardholder data

SSAE 18 is a series of enhancements aimed to increase the usefulness and quality of SOC reports, now, superseding SSAE 16, and, obviously the relic of audit reports, SAS 70

ISO 27001 is a certification for criteria structure represented by ISO 27002, which is a framework for an Information Security Management System (ISMS). Specifically, Information Security Policies, Access Control, Physical and Environment security, Operations Security, Systems Acquisition and maintenance, and Supplier Relationships are applicable.

United States legislation that defines a comprehensive framework to protect government information, operations and assets against natural or man-made threats. FISMA was signed into law part of the Electronic Government Act of 2002.

Mandated by the U.S. Health and Human Services Dept., the Health Insurance Portability and Accountability Act of 1996 specifies laws to secure protected health information (PHI), or patient health data (medical records).
